Zoom Security Update

In order to improve the security of Zoom Meetings, the Zoom company is changing default settings effective September 27. This change impacts meetings that do not have either a passcode or waiting room turned on. The new default setting will turn on Waiting Room by default. We already recommend both a Meeting passcode and Waiting Room when feasible. In larger classrooms (100+) it may be difficult to manage students entering class after the initial addition of participants from the waiting room. If you don't have a person available to manage users entering and re-entering the waiting room, there could be frequent interruptions as late students request entry from the waiting room.

MyMSU Changes for employee

For those that approve time sheets a major change to the Banner system has been implemented. The old system will be available through the end of this month to allow for training opportunities for the new system. Information for this training will be in a future newsletter.

Windows updates

The monthly updates for Windows have been released by Computer Services. These updates should be installed automatically. The deadline for these updates is Monday, October 12th, 2020. That means if you typically leave your computer on, you should save any open documents and reboot your computer before the deadline. Otherwise your computer will update and restart automatically.

Upcoming training opportunities

Using LockDown Browser for Exams. September 21, 2020, 9:00 AM. No registration necessary. See more information and the link to the virtual training session at the [calendar event](#).

Managing Course Content. September 22, 2020, 1:00 PM. No registration necessary. See more information and the link to the virtual training session at the [calendar event](#).

Introduction to Collaborate Ultra. September 23, 2020, 3:30 PM. No registration necessary. See more information and the link to the virtual training session at the [calendar event](#).
